CURRENT TOWN: Juja, Nairobi Kenya

PROFESSIONAL SUMMARY

-I am a motivated, adaptable, diligent and responsible undergraduate student at Jomo Kenyatta University of Agriculture and Technology pursuing a Bachelor's degree in Electronics and Computer Engineering. I am computer literate; good with database systems, Microsoft publisher and spreadsheets.
-I also have basic knowledge on embedded systems, futter and C/C++ programming languages; not as good but I am willing to be taught and to learn from my supervisors. I have artistic skills such as sketching, woodwork and CAD Design. Let us say I love learning new skills and creating new things.
-I enjoy working towards innovative and impactful projects. I love order, consistency and a strong drive to see things through completion. A strong believer and upcoming engineer aspiring to provide a more stable state of life through innovation and creation.

TECHNICAL SKILLS

- Database management systems (SQL)
- Access and Excel packages
- Basic knowledge on C and C++, and Dart languages
- Internet of Things implementation and Embedded systems
- PCB design
- 3D design
- Mobile Development with Flutter

SOFT SKILLS

- Creative thinking
- Multitasking
- Teamwork
- Planning

EXPERIENCE

2017: Unity primary school

- IT assistant.

I was in charge of the NEMIS account of the school. I did the registration of both students and personnel of the school into the Ministry of Education NEMIS portal.

January-May, 2021: Gearbox Pan African Company

-Intern

I interned at Gearbox Pan-African company, which was started to facilitate learning for entrepreneurs and students to improve efficiency in manufacturing and reduce the cost of input. It helped me practice on hands-on skills revolving about Internet of Things.

I was attached at the Gear box Academy where the main objective was to impart on the hands-on skills through human centered designs and I4R (Industry 4 Revolution) technologies.

Among the task I did were:

1. Designing home automation and COVID reduction IoT projects like the automatic door system.
2. Creating website portfolios.
3. Design of a smart attendance system, automatic fire extinguisher, smart farm project, smart security system and a smart home project.

January-May, 2022: Neverest LLC Limited

-Intern

I interned at Neverest LLC Limited, which is a startup company aimed to transform mobile phones and we platforms into income generating instruments. It is highly skilled in software developments, data science, web development, UX/UI interfaces and internet of things.

I was attached at the IoT lab where literacy in engineering and technical fields is promoted. I was trained to look at a problem from an industrial perspective and attempt to come up with an effective solution using all available resources within reach.

Among the tasks I did were:

1. 3D designing and Implementation using Autodesk Fusion 360
2. Electrical designs using EasyEDA platform.
3. PCB design and fabrication.
4. Projects on smart tank system and contactless lighting system.

Current: Nakuja Project

-Intern

I am currently working as an intern in the JiCa Nakuja Project, sponsored by Japan, involved in designing and launching the N3 rocket. I work under the Airframe team. I am tasked with:

1. Designing the Airframe that is the body of the rocket.
2. Fabricating the said designs.
3. Making sure that the rocket will be stable that is by calculating the aerodynamic properties of the N3 rocket.
4. I also help the Avionics team which is in charge of the telemetry of the rocket and recovery systems.

EDUCATION

BACHELOR OF SCIENCE ELECTRONICS AND COMPUTER ENGINEERING

-SEP 2018 TO CURRENT,

-JOMO KENYATTA UNIVERSITY OF AGRICULTURE AND TECHNOLOGY,

-JUJA, NAIROBI KENYA.

KENYA CERTIFICATE OF SECONDFARY EDUCATION

-2014 TO 2017

-NAIVASHA GIRLS SECONDARY SCHOOL

-NAIVASHA, KENYA

KENYA CERTIFICATE OF PRIMARY EDUCATION

-2010-2013

-BAHATI GIRLS BOARDING PRIMARY SCHOOL

-BAHATI, NAKURU

INTERESTS

- Programming
- Internet of things and solutions
- Embedded systems development
- Art
- Writing
- Wood and metal work
- Volunteers work at school under the Society of Engineering students.

LANGUAGES

English – fluent

Kiswahili - fluent

COMMUNITY SERVICE

- Volunteer work at school under the Society of Engineering students. I was the deputy chairperson of the publicity committee and later on was promoted to chair the Publicity committee.
- Volunteer work at under the Hope Aura charity group.
- Part of the co-founders of a STEM initiative, Code-Arc, to teach young girls in high-school about Internet of Things, mobile development and cloud.

ACHIEVEMENTS

- 2021-2022, I was awarded the best chairperson during that tenure IN THE Society of Engineering Students.
- February 2023, third runners up in the EABL JKUAT Stem engagement day.
- April 2023, won the Huawei Regionals ICT Competitions.
- May 2023, won the Huawei Global ICT Competitions.

REFFEREES

1. MR. DANIEL KARIITHI

   PRINCIPAL,

   UNITY PRIMARY SCHOOL
